

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. A SHORT CALENDAR OF THE
TOPOGRAPHICAL AND GENEALOGICAL
BOOKS AND MSS. IN THE
FREE LIBRARY AT NORWICH

BY
WALTER RYE.

As this is undoubtedly the largest and most accessible library relating to topography which is available at all times to local searchers, it occurred to me that my readers would like to have a catalogue of its contents which may save them journeys to the British Museum or to Cambridge, or the trouble necessary to obtain access to the very fine Colman library, once at Carrow, and now at Crown Point. A copy of the catalogue of this last-named library is at the Free Library, and should be consulted if a desired work is not to be found in the following pages.*

When I had the honour of being made a co-opted member of the City Free Library Committee I found the local collection arranged alphabetically in author's names—an arrangement which made it practically valueless to anyone who was not thoroughly up in the subject he wanted to look up. To remedy this I volunteered to compile the present card catalogue (which contains about 14,612 references to the full titles and dates of the items shortly set out hereafter in case the reader wants to have them), giving as many cross references

*A catalogue, completed in MS., of the Carrow library, as greatly added to since its publication, is in the custody of Mr. James Reeve, who will, no doubt, allow access to it to any real worker.

to subjects as I could work in. In practice, however, this was not satisfactory. A student could not look up at home what he wanted for the next day for want of a class catalogue, so with the consent of the Committee I have now re-arranged the Reference Library under the following heads, so that all the books of the same class are now together:—

Agriculture, F. 8, G. 8	Geology, I. 7,

When I presented the Smith Collection of Maps to the Library I issued in the Norfolk Antiquarian Miscellany a list of these and all other maps known to myself and to Mr. Harry Brittain, who kindly compiled such list. This catalogue, which also first appeared in the Norfolk Antiquarian Miscellany, is another instalment, and I hope in future years to print catalogues of (1) the topographical prints and photographs, (2) the portraits (the bulk of which also formed part of the Smith collection, and which I have now arranged in lexicographical order) and (3) of the Biographical Works.

I shall be very grateful for any corrections, and especially also to be the means of obtaining for the Library any volumes not included in the present list. It is obviously for the benefit of workers to have as good a collection as possible of local books all under one roof, and all catalogued up. Some day, perhaps, the authorities will spend the small sum of money which is necessary to print a catalogue of the whole library, and thereby double its value.

Meanwhile I propose to go on doing what I can at my own expense.

WALTER RYE.

GENERAL INDEX.

This Index not only includes the works mentioned in the foregoing pages, but gives the press marks of such books and series in the rest of the Reference Library as I think may be useful to the student of such library generally. It does not profess to be a perfect index, but may fill a temporary gap, and, as it is a gift horse, it is hoped that reviewers and others will not look too closely into its mouth!

I have to acknowledge my obligations to Mr. W. G. Clarke, Mr. H. F. Euren, and Mr. J. Hooper, for having very kindly read and made very many corrections on the proofs of this little work.

W.R.
